**eForm 337**  
**Delete Previous/Expired Digital Certificate**

**Version 2.0**  
**April 2016**

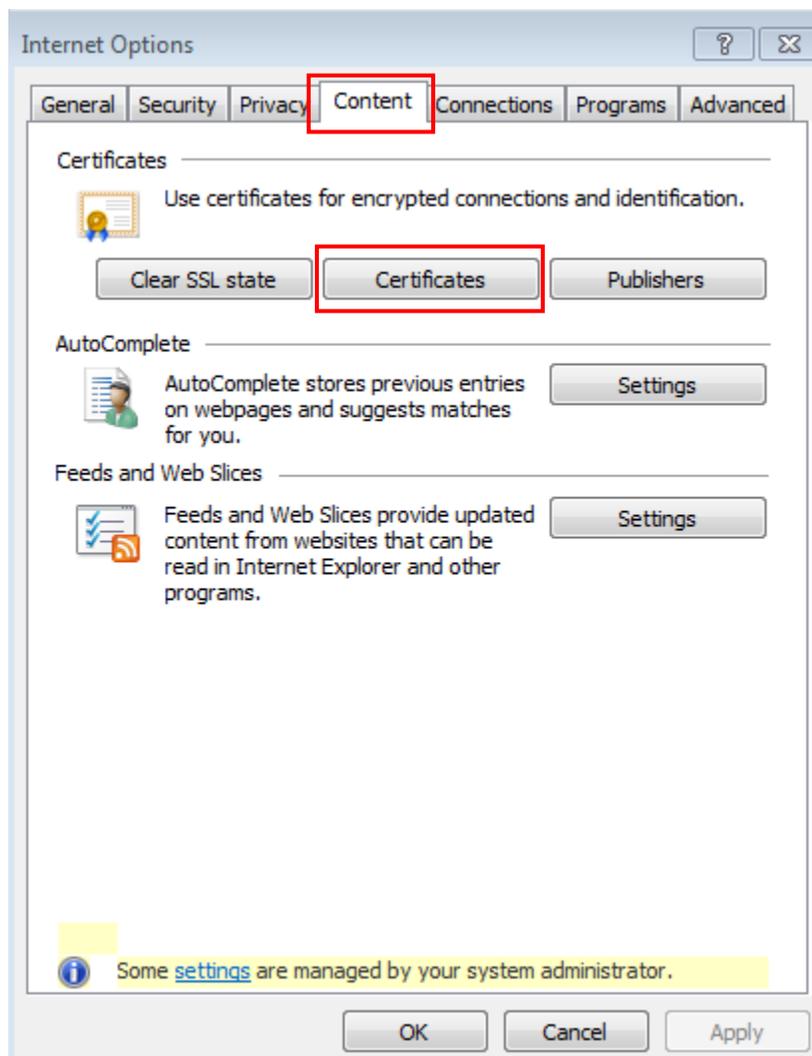

## eForm 337 - Delete Previous/Expired Digital Certificate

It is recommended that a certificate be deleted whenever it is being reinstalled, replaced or revoked.

*To delete your previous and/Expired digital signature:*

1. From the Internet Explorer menu bar, select **Tools>Internet Options**.

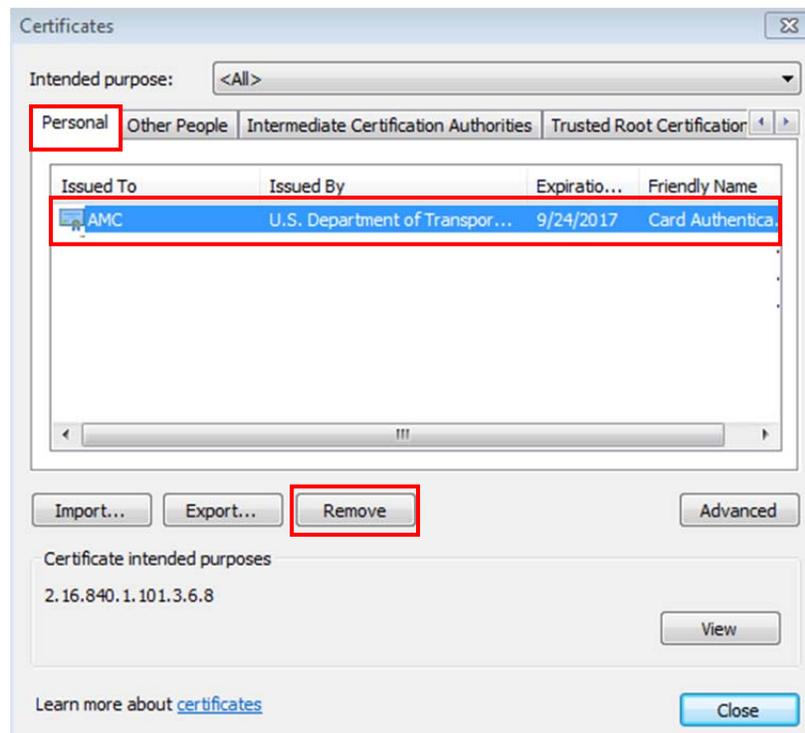

The Internet Options window appears.

**Figure 0-1. Internet Options**

2. Click the **Content** tab.
3. From the Contents tab, click the **Certificates** button.

The Certificate pop-up window appears (as shown in the following figure).

**Figure 0-2. Certificates Pop-Up Window**

4. To display your certificate record, select the **Personal** tab.
5. Select the certificate to be deleted.
6. Click the **Remove** button.
  - If the following message appears, click the **Yes** button.

**Figure 0-3. Certificates Pop-Up Window**

- The Certificate record no longer appears in the Certificates pop-up window.
7. To delete additional certificates, repeat step 1 thru step 6.
